The expert in customised LED marker-lights, LEC provides cities with efficient and durable lighting solutions that improve safety in urban environments.

In addition to improving night-time safety, city authorities need lighting that is also **energy-efficient**, **visually pleasing** and **eco-friendly**. Since 1977, LEC has been offering **customised LED marker-lights** that fit all these requirements.

Customised LED marker-lights to improve night-time urban safety

LED experts with 40 years' experience, LEC helps municipalities achieve their night-time urban **safety plan** objectives. Our **customised LED solutions** are long-lasting and **efficient**, specifically adapted to the **needs** of our customers and focused on public safety and well-being.

Our **ranges** of in-ground luminaires for **pavement kerbs** are perfect for improving public safety through light marking :

1. Our [1836-Ville de Paris](#) LED marker-light are installed into the kerb to light up **roads**.

They have been used [Le Lavandou](#), on the French Riviera, to improve safety along a street that is extremely busy during summer nights and where poles are not feasible. In the [French Indies](#), [Saint-Pierre](#) and in [Nîmes](#), our 1836-Ville de Paris LED marker-light are used to illuminate public transport lanes.

2. Our [1832-Angouleme](#) LED marker-light are used to mark traffic islands and roundabouts.

At the Ollioules roundabout in Faveyrolles, our customised LED marker-light help signal the correct direction for traffic. The Place Wallis roundabout in Luxembourg is indicated using our 1832-Angouleme LED marker-light, box-mounted especially upon request.

Efficient, long-lasting LED solutions for urban marking

Our projectors and marker LEDs offer cities an **efficient** and **durable** solution to urban lighting that helps **save energy** and contributes to **sustainable development** efforts.

LEDs have several **advantages** for improving night-time urban safety:

- **Instant lighting, dimmable and directional**: they can be adapted to all types of installation and needs.
- **Efficient, robust and safe**: they minimise maintenance and service down-time.
- **Durable, unharmed and economical**: they contribute to the city's ecological transition and reduce [light pollution](#).

Check out our [range of customised LED marker-lights for pavement kerbs](#) and our projects for **French and international clients**.

Do you want to improve night-time safety in your city through **light marking**? [Request a call-back](#) from an LEC representative.
