

5632 ARCHES

This compact linear spotlight is designed to be installed on a windowsill or facade belt-course. Fitted with an 100x12° lens, the uprights and lintel of the windowframe will be illuminated without emitting any unwanted-beams.

For installation on an architectural belt-course, the choice of available lenses allows upward converging beams or uniform wall-washing of the facade despite being installed very close to the facade.

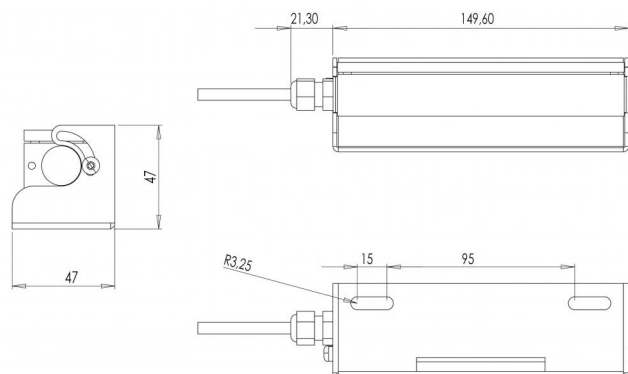

APPLICATIONS:

- Windowframe lighting
- Wallwashing
- Architectural heritage enhancement
- Path lighting
- Direct or indirect lighting of public space
