

Public spaces in Colombes

Both public spaces - square Aragon and square Victor Basch were renovataed in order to create a harmony between these two public spaces, including through public lighting.

The 8'18" light designers required a light enhancement of these two places with six poles dispatched on one place each.

For this project, LEC developed special products to equip all 12 poles, each of them with a colour strip combining an 8 meters-long lightbar 5620-Brunei with 120 special neutral white LEDs and PMMA strips with colour codes, one of the place in the red ochre tones and the other in green yellow tones.
