

Hôtel Dieu in Toulouse

« Do better with less! »

Such is the economic and energy line defined by the City of Toulouse (South of France), when they started their Light Enhancement Plan in 2015.

The City values its heritage through choosing LED technology, and offers a fresh new illumination to Hôtel Dieu Saint-Jacques, Toulouse.

Uniformity of light was the key requirement to up-light the whole facade of this symbolic building.

The luminous intensity is directed to increase the light efficiency.

Contracting Authority: City of Toulouse
Lighting designer: LEA
