

Footbridge of the Mont Saint Michel, France

To up-light the footbridge that links the Mont Saint-Michel to the continent, Dietmar Feichtinger Architectes agency wanted a fully integrated lighting that was discreet and durable to the extreme weather conditions of this legendary place.

Thus, LEC manufactured 430 meters of 5620-Brunei lightbars (296 tailor-made lightbars of 1,45 meters-long) that are integrated underneath the separating linear.

Client: Syndicat Mixte Baie du Mont Saint-Michel
Prime contractors: DFA - Dietmar Feichtinger Architectes and BET Schlaich Bergermann und Partner
