

Tramway tracks, Bordeaux

Brochet, Lajus and Pueyo architects, in association with Elizabeth de Portzamparc and SIGNES group, wanted to mark out through a strong visual effect the tracks of the tramway of Bordeaux, South West of France. They implemented bespoke fittings all along the tracks.

LEC developed 3 special types of lightbars made out of cast aluminum and using the 5620-Brunei spotlight including: 1 protruding fitting with a 1m40 length + 2 lightbars both with a 43 cm length, out of which one is with protusion, the other isn't.
